

System and Unit Test Report

Slug N Found

23 July 2019

Working Prototype:

Functions not working correctly:

1. Email verification
 - a. Issue: Can sign up with any ucsc email but there is no email verification
 - b. Location of fault: Sign Up Page
 - c. Possible action for removal: For security reasons, we would send users an email to the email address provided in order to confirm identity
2. Not responsive on mobile devices
 - a. Issue: Overlapping of div elements when rendering on smaller screens
 - b. Location of fault: All pages on web app
 - c. Possible action for removal: Modifying CSS files for layout of each page
3. Images are fixed sizes
 - a. Issue: Images get stretched and/or distorted
 - b. Location of fault: Home Page
 - c. Possible action for removal: Modifying CSS for images
4. Notifications
 - a. Issue: When a user receives a message they will not get notified through the web app nor email. They can only see the messages when they open a chat with another user
 - b. Location: Messaging Page
 - c. Possible action for removal: Adding toasts or alerts on screen to notify user when they have unread messages
