

Sprint 1 Report - Slug N Found

July 8, 2019

Names : Jacqueline Montes - De Leon, Jasleen Kaur, Gurpreet Singh, Steven Dinh, Cesar Amaya, Haize Zhang

Actions to Stop Doing:

Our team has decided to stop being vague regarding what we are doing. If we stop being vague and go into details, that will allow us to not overlap into other team member's tasks. This will also allow us to completely grasp how much work there is behind a single user story.

Actions to Start Doing:

Our team has decided to communicate better through zoom meetings and group work sessions. This will put a stop to miscommunications and put each one of us in check, as we will have to answer to our teammates in person, rather than behind a screen.

We also are going to work on breaking down our user stories more. Since we did not completely break them down, this caused us to not finish the whole user stories, rather tasks for the stories.

Actions to Keep Doing:

Many people of our team do not know the languages we have decided to work with, but they are not demotivated by that and working hard to learn. We are going to keep learning on the side and apply to our project.

Work Completed:

1. As a user, I want the ability to create an account and login so that I can view items that are lost/found. (WHOLE STORY)
2. As a user who lost/found something, I want the ability to upload an image of an item I found/lost so that the person who is looking/posting the item can identify exactly what it is.
 - Uploading completed, but pulling to home page pending.

3. As a user who lost/found an item, I want the ability to view previous items that are found/lost so that I can see if someone has posted about said item previously and contact them through it.

- Ability to view completed, but pulling from database pending.

Work Not Completed:

User story 1 is completed. For User Story 2 and 3, the ability to upload and view, respectively, are completed. The only task remaining is to pull them up as one onto the homepage.

Work Completion Rate:

Total Number of Completed User Stories:

Ideal Number of Hours: 30 hours

Total Number of Days: 6

User Stories/Day: 0.5
